

## NTLB: No Teacher Left Behind ©

**Technology Assessment to Achieve Results Based on MS Technology Standards for Teachers.  
 MDE requires all teachers to be qualified to use technology for instruction by 2008.**

**Package includes: Pre-assessment -- Customized Plan -- Post Assessment**

The pre-assessment of teachers' technology skills (in alignment with the Mississippi Technology Standards for Teachers developed by MDE) with analysis report is the basis for a recommended professional development plan that will be followed by a post assessment upon completion of the training. (Professional development sold separately.)

**Assessments include:**

1. Understanding of terminology for technology and the ability to perform tasks such as word processing, spreadsheets, printing, file management, e-mail, and utilization of Internet.
2. Evaluation of teacher's ability to find and use quality instructional technologies related to their subject area and/or grade level including: software, Internet resources, video tapes/discs, digital cameras, and video conferencing.
3. Understanding of laws as they apply to technology including license agreements, copyright material, federal, state, and district rules for technology use, student privacy, and equal opportunity for access by students.
4. Exhibit ability to apply technology in instruction including lesson plans and presentations, class schedules, correspondence, and classroom administration.
5. Ability to create classroom instruction that encourages critical thinking, problem solving, and creative skills.

**Price: \$110/per Teacher** (Maximum of 20 teachers per session. Price includes travel.)

**For more information on how we can assist your school district in creating a plan leaving No Teacher Left Behind from integrating technology into their classroom.**
